Unlock. iPhoneography Montreal's Unlock exhibition offers the visions from three artists who have iPhoneography as a common medium, a new form of mobile photography that is gradually being accepted in the evolving world of the visual arts. Literally, the title refers to the function of unlocking the iPhone, but figuratively, it is the evocation of creative freedom, so inherent to mobile art. Finally, the Unlock exhibition pushes the boundaries by working with EyeEm from Berlin, a group that promotes mobile art through a website of international reputation. Two artists will be selected by the EyeEm team and MissPixels to exhibit their work with us.
